

Claudia Pigliacelli is a Tenure-Track Assistant Professor at the Department of Chemistry, Materials, and Chemical Engineering “Giulio Natta” of Politecnico di Milano. She received her PhD in Pharmacy from the University of East Anglia (2015). She has been a research assistant and postdoc researcher at Politecnico di Milano (2013–2016), and worked as postdoc at Aalto University (Finland, 2016-2019) and at the Centro de Investigaciones Científicas Avanzadas (CICA, Universidade da Coruña, Spain, 2020). Her research interests focus on the design of nanoscale systems based on peptides and inorganic nanoparticles, which application is not limited to but mostly fall in the biomedical field.
