

Dr. **Theocharis C. Stamatatos** is a Full Professor of Inorganic Chemistry at the Chemistry Department of the University of Patras. He was born in 1980 in Patras, and received his Bachelor's degree in Chemistry in 2003 and his Ph.D. in 2006 from the Chemistry Department of the University of Patras. From 2006 to 2008, he conducted postdoctoral research at the Chemistry Department of the University of Florida (Gainesville, USA), and from 2009 to 2012, he served as a Temporary Lecturer at the Chemistry and Materials Science Departments of the University of Patras. From 2012 to 2018, he worked as a faculty member (Assistant and Associate Professor) of Molecular Inorganic Chemistry at the Chemistry Department of Brock University (Ontario, Canada). In addition to his postdoctoral and academic career in the USA and Canada, his research abroad includes research stays at: (i) 8 months at the Chemistry Department of the University of Cyprus (2004–2005), (ii) 3 months at the Chemistry Department of the University of Manchester, UK (2005), (iii) 6 months at the Chemistry Department of the University of Florida, USA (2005–2006), and (iv) 12 months at the Chemistry Department of the University of Mainz, Germany (2016 & 2018). He currently holds the following positions: (a) Associate Faculty Member at the Hellenic Open University, and (b) Collaborative Faculty Member at the Institute of Chemical Engineering Sciences, Foundation for Research and Technology – Hellas (FORTH/ICE-HT), Patras.

His research activity as an independent researcher in Greece and Canada has been funded by the Natural Sciences and Engineering Research Council (NSERC) of Canada, Ontario Ministry of Research and Innovation, NSERC Research Tools and Instruments, the Canada Foundation for Innovation (CFI), the Operational Program “Human Resource Development, Education, and Lifelong Learning 2014-2020”, as well as by private organizations. Throughout his career, he has received the following awards and distinctions:

- “Young Investigator Award”, American Chemical Society 2007, Boston, USA.
- “A DocMolMag Award” – A European Award for the best PhD thesis in Molecular Magnetism and related fields, Florence, Italy, 2008.
- “Emerging Investigators”, Royal Society of Chemistry, 2010 & 2024.
- “Chancellor’s Chair for Research Excellence”, Brock University, Canada, 2016-2018.
- “Humboldt Research Fellowship for Experienced Researchers”, Alexander von Humboldt Foundation, 2015-2018.

Under his supervision, 6 PhD and 20 postgraduate research theses have been completed, and he has supervised the research activities of 5 postdoctoral researchers. He is a member of the editorial boards for 6 scientific journals and has served as a guest editor for special issues of recognized peer-reviewed journals. He also reviews for more than 80 journals and over 10 national and international funding organizations (i.e., USA, Canada, Czech Republic, Netherlands, New Zealand, Chile, Kazakhstan, Poland, Cyprus). He has participated in various organizational committees for national and international conferences and was a founding member of the "Panhellenic Conference in Inorganic Chemistry," held every two years at universities across Greece. He has participated in 193 conferences (international and national) through poster presentations and oral talks and has given over 40 invited lectures at recognized research institutions in Greece and abroad.

Research Metrics – Quantitative Data

Total number of publications in peer-reviewed journals: 179

h-index: 48 and total number of heterocitations: ~5500
