

Dr. Tuğba Güngör was born in 1985 in Ankara, Turkey. She graduated from Ankara University, Department of Chemistry in 2007, as the top student in this department. She completed master's degree at Ankara University in 2010 with the title of “Synthesis of dioxane based thiophene and pyrrole monomers and investigation of their conductive polymer properties”. She completed doctorate program at Çanakkale Onsekiz Mart University in 2016 with the title of “Development of aromatic and heterocyclic prodrug compounds for nitroreductase based cancer therapy”. During PhD education, she went to Oregon State University, Department of Chemistry, USA in 2015 for 6 months to get some experience on natural product chemistry with the supervisor of Prof. Rich G. Carter. She started working as research assistant at Çanakkale Onsekiz Mart University since 2011. She is ongoing research in design, synthesize and characterization of novel organic bioactive molecules using for various essential medicinal applications such as anticancer, antiinflammatory, etc in Natural Products and Drug Research Laboratory. Now, she is working at Çanakkale Onsekiz Mart University, Department of Chemistry as Assoc. Proffesor.
