

GIORGIO OLIVO

EMPLOYMENT	
15/11/2021-now	Assistant professor of Organic Chemistry at “La Sapienza” University of Rome (Ricercatore a tempo determinato di tipologia B) Supramolecular approach to catalysis, C-H functionalization, bioinorganic chemistry
01/2020-11/2021	Post-doctoral fellow (Assegno di ricerca) at “La Sapienza”, University of Rome. Prof. Stefano Di Stefano <i>Research group</i> <i>Work</i> Supramolecular Catalysis
02/2016-10/2020	Post-doctoral fellow at QBIS-CAT, IQCC, Universitat de Girona (2016 as “borsa di perfezionamento all'estero fellow, 2017-2019 as a 2017 “Juan de La Cierva” fellow) Miquel Costas <i>Research group</i> <i>Work</i> Tuning selectivity in C-H oxidation catalysed by Fe and Mn complexes
EDUCATION	
10/2012-12/2015	PhD in Chemistry at “La Sapienza”, University of Rome. Nonheme iron complexes as catalysts for non-activated C-H oxidations <i>Thesis Title</i> <i>Supervisors</i> Dr. Stefano Di Stefano
10/2014-05/2015	Short stay at “Universitat de Girona”, Catalunya, Spain. Investigation of the oxidation mechanism of an imine-based iron catalyst. <i>Objective</i> <i>Research group</i> Miquel Costas
2010-2012	Master degree thesis in Chemistry at “La Sapienza”, University of Rome. Graduated with full marks (110/110 cum laude, average grade 29.6/30). 2 years on 2 years required. <i>Thesis Title</i> <i>Supervisors</i> Dr. S. Di Stefano, Prof. L. Mandolini
2007-2010	Bachelor degree thesis in Chemistry at “La Sapienza”, University of Rome. Graduated with full marks (110/110 cum laude, average grade 28.7/30). 3 years on 3 years required. <i>Thesis Title</i> <i>Supervisors</i> Dr. S. Di Stefano, Prof. L. Mandolini
2002-2007	“ Diploma di maturità classica ” (high school) with full marks (100 /100) at Liceo classico “Vitruvio Pollione”, Formia (LT).

GIORGIO OLIVO

PUBLICATIONS

GRANTS

Fellowships

2017-2019

- “Juan de La Cierva Post-Doc Fellowship 2017” of 2 years, after national Spanish selection (FJCI-2016-30243)

2016

- “Post-Doc Fellowship” (2016, Borsa di perfezionamento all'estero) to work in Dr. M. Costas research group in Girona, Spain.

2012-2015

- “Ministry Funded PhD Fellowship” of 3 years (2012-2015) after national selection (first with full marks, 120/120).
- “RSEQ-JIQ fellowship” to participate in ICCC conference (2018)
- “COST Grant” to participate to ISOC conference (2013)
- 2 “University Library Scholarship” (2010, 2011).

Funded grants as PI

2021

GIORGIO OLIVO

		<ul style="list-style-type: none">• “Progetto Avvio alla Ricerca” (Controllo Supramolecolare sulla C-H Funzionalizzazione Fotocatalitica) of 2.400€ (research grant designed for postdocs and PhD students) awarded by “La Sapienza” university. 2021• “Reaxys-SCI Small Research Grant” (S-ReCHOx) of 5.000€ awarded by Elsevier and Società Chimica Italiana after national selection (3 grants awarded over 93 participants). 2020• “Progetto Avvio alla Ricerca” (C.I.A.O.) of 2.000 euro (research grant designed for postdocs and PhD students), on the activity on imine-based iron complexes as oxidation catalysts. 2014
	<i>Funded projects as participant</i>	<ul style="list-style-type: none">• “Catálisis de oxidación bioinspirada mediante diseño racional de catalizadores” (PGC2018-101737-B-100)” of 242.000 € da MICINN, Spain. PI: Dr. Miquel Costas, 2018• “HIGHVALCAT (CTQ2015-70795-P)” of 157.000 euros from MINECO, Spain. PI: Dr. Miquel Costas, 2016• “Grande Progetto di Ateneo” of 35.000 euros, from “Sapienza” University. PI: prof. Paola D’Angelo. 2015• Accepted “Synchrotron Proposal” to ESRF (Grenoble, France). 2016• Accepted “Synchrotron Proposal” to ESRF (Grenoble, France). 2015• Accepted “Synchrotron Proposal” to ESRF (Grenoble, France). 2014
AWARDS		<ul style="list-style-type: none">• “<i>Best Oral presentation</i>” in Suprachemdays conference (2021)• “<i>Best Oral Presentation</i>” in ISOC-MMM conference (2019)• “<i>Boehringer Ingelheim Stiftung award</i>” in ISMSC conference (2019)• “<i>Best Oral Presentation</i>” in “VI Convegno Giovani” (2014)• “<i>Excellent Graduate</i>” of Academic year 2011/2012 released by the University Dean and Fondazione Sapienza.
TEACHING EXPERIENCE		<ul style="list-style-type: none">• Co-Lecturer of General Chemistry (to Biology students, academic year 2019-2020, Universitat de Girona, 2019/2020).• Committee member of Master in Chemistry final examinations (Universitat de Girona, 19/07/2019 and 12/09/2020).• Lectures on Physical Organic Chemistry course (Università La Sapienza, Roma, 2014-2015)• Mentoring and informal supervision of master and bachelor thesis students (7 master and 4 bachelor students in the PhD, 4 PhD and 1 bachelor students in the PostDoc).

RESEARCH INTEREST		
<i>Post-Doc</i>		My post-doc work in Prof. Miquel Costas’ group focuses on the use of weak interactions to control selectivity in C-H oxidations catalyzed by bioinspired Fe and Mn complexes with H ₂ O ₂ . Such catalysts bear supramolecular receptors (18-crown-

GIORGIO OLIVO

	6 ethers) to recognize protonated primary amines. Ammonium binding exposes only certain specific C-H bonds that are in a precise geometric relationship with the amine function, to the oxidizing moiety leading to selective, remote oxidation. Supramolecular recognition overrides the intrinsic reactivity pattern of the substrate and enables a geometric control over the reaction selectivity. This effect is studied to attain site-, substrate- and stereo-selective C-H (and C=C) oxidations.
<i>PhD</i>	My PhD work, under the supervision of Dr. Stefano Di Stefano, lies at the interface of Organic and Inorganic Chemistry. The PhD project, which has been proposed by myself, is aimed at the study of oxidations catalyzed by nonheme iron complexes from both a mechanistic and a synthetic perspective. A new, simple catalyst has been designed and tested in aliphatic and aromatic C-H oxidation. Mechanistic investigations have been carried out both on the new catalyst and on already reported systems.
<i>Short stay in Prof. Costas research group</i>	The mechanism of H ₂ O ₂ activation and C-H oxidation by an imine-based coordinatively saturated iron complex has been investigated and elucidated.
<i>Master Thesis</i>	My master thesis focused on the evaluation of substituent effects on the oxidative activity of an iron complex and on the synthesis of the corresponding pyridine-based complexes.
<i>Bachelor Internship</i>	My bachelor work was devoted to the study of calixarene-containing receptor systems.
